

Literature Benchmark Brief: Bianchi_2006_Springer

Title: Wind turbine control systems: Principles, modelling and gain scheduling design

Authors: F. D. Bianchi, H. De Battista, R. J. Mantz (2006)

Venue: Springer Science & Business Media | **DOI:** 10.1007/1-84628-493-7

Cluster: Cluster C: Aerodynamics & Control Cliff

Core Theoretical Mechanism & Model Formulation

Mathematical treatment of non-linear control switching between MPPT and pitch regulation

Empirical Scale & Experimental Dataset

Standard textbook control monographs

Relevance to IEEE TSTE & Sustainable Energy Systems

Rigorous proof of control objective discontinuity between Region 2 and Region 3

Identified Gaps & Operational Vulnerabilities

Control theory framework without statistical machine learning formulation

Role in Manuscript Defense & Reviewer #2 Proof

Cited for dP/dv derivative jump: cubic growth collapsing to zero at u_{rated}
