

Literature Benchmark Brief: Li_2018_ICLR

Title: Diffusion Convolutional Recurrent Neural Network: Data-driven traffic forecasting

Authors: Y. Li, R. Yu, C. Shahabi, Y. Liu (2018)

Venue: ICLR | **DOI:** 10.48550/arXiv.1707.01926

Cluster: Cluster A: Spatio-Temporal Wind/Wake

Core Theoretical Mechanism & Model Formulation

Bidirectional directed random walk diffusion coupled with Gated Recurrent Units

Empirical Scale & Experimental Dataset

Complex sensor networks with directed flows

Relevance to IEEE TSTE & Sustainable Energy Systems

Theoretical foundation for directed wake diffusion formulation in Eq. (6)

Identified Gaps & Operational Vulnerabilities

Assumes constant transition matrix; does not incorporate fluid wake expansion

Role in Manuscript Defense & Reviewer #2 Proof

Directly cited in Section II-B for directed diffusion operator over turbine wake cones
