

Literature Benchmark Brief: Yu_2018_IJCAI

Title: Spatio-Temporal Graph Convolutional Networks: A deep learning framework for traffic forecasting

Authors: B. Yu, H. Yin, Z. Zhu (2018)

Venue: IJCAI | **DOI:** 10.24963/ijcai.2018/505

Cluster: Cluster A: Spatio-Temporal Wind/Wake

Core Theoretical Mechanism & Model Formulation

Chebyshev spectral graph convolution interleaved with 1D gated CNNs

Empirical Scale & Experimental Dataset

Standard spatial benchmark networks

Relevance to IEEE TSTE & Sustainable Energy Systems

Pioneered spatio-temporal graph modeling in spatial grid infrastructures

Identified Gaps & Operational Vulnerabilities

Static graph topology cannot adapt to changing wind inflow angles

Role in Manuscript Defense & Reviewer #2 Proof

Establishes baseline taxonomy for spatio-temporal graph forecasting
